Professional Summary

Experienced Software Engineer with a strong background in developing scalable web applications and working with modern technologies. Proven ability to lead teams and deliver projects on time and within budget.

Work Experience

Senior Software Engineer

Google Inc., Mountain View, CA

January 2020 - Present

- Led the development of a large-scale web application serving millions of users.
- Implemented performance optimizations that improved application speed by 30%.
- Collaborated with cross-functional teams to define project requirements and deliverables.
- Mentored junior developers and conducted code reviews.

Software Engineer

Microsoft Corp., Redmond, WA

June 2015 - December 2019

- Developed features for a cloud-based collaboration tool used by thousands of enterprises.
- Automated testing processes, reducing the time required for regression testing by 50%.
- Participated in the migration of a legacy application to a microservices architecture.

Resume

Education

Master of Science in Computer Science

Stanford University, Stanford, CA

2013 - 2015

Bachelor of Science in Computer Science

University of Illinois at Urbana-Champaign, Urbana, IL

2009 - 2013

Skills

Programming Languages: Java, Python, JavaScript, C++

Web Technologies: HTML, CSS, React, Node.js

Databases: MySQL, MongoDB, PostgreSQL

Tools: Git, Docker, Kubernetes, Jenkins

Certifications

Certified Kubernetes Administrator (CKA)

AWS Certified Solutions Architect

Projects

Project Management System

- Developed a project management system that streamlined task assignments and tracking for teams.
- Utilized React for the front end and Node.js for the back end, with a MongoDB database. The

Resume

system enabled real-time collaboration and provided detailed analytics on project progress and team performance.

E-commerce Platform

- Created a full-featured e-commerce platform supporting secure user authentication, product listings, and a payment gateway. Integrated third-party APIs for payment processing and shipping. The platform featured a user-friendly interface, advanced search capabilities, and a robust admin panel for managing products and orders.

Customer Relationship Management (CRM) System

- Designed and implemented a CRM system to help businesses manage customer interactions and data throughout the customer lifecycle. The system was built using Angular for the front end and Django for the back end, with PostgreSQL as the database. It included features like contact management, sales automation, and detailed reporting to enhance customer relationships and improve sales efficiency.
